Priyanshu Upadhyay

Digital Transformation | System & Data Expert

Luleå, Sweden priyanshu.electrical@gmail.com +46 702295799 Priyanshu Upadhyay

SUMMARY

Structured and detail-oriented **Systems Specialist** with **14+ years of experience** in **digital transformation, enterprise systems**, and **project controls** across global engineering and operations environments. Proven track record in optimizing **business-critical platforms** such as **Primavera P6, Jira, Power BI, Fabric** and **SQL Server** to enhance **system adoption, data integrity**, and **operational efficiency**. Adept at translating **business needs** into **functional requirements**, driving **system integration**, and delivering **user training**, **documentation**, and **process governance**.

Leverage strong expertise in **Project Management**, **IT systems**, and **data analytics** to harness data from **multiple sources**, enabling **data-driven innovation**. Skilled in **validating**, **interpreting**, and **presenting complex insights** to senior leadership in clear and actionable terms—**optimizing costs**, streamlining **processes**, and accelerating **business performance** through **advanced analytics**, **automation**, and **reporting frameworks**.

EXPERIENCE

Report Leader – Data Analyst | IDOM Consulting, Engineering, Architecture – Sweden **Feb 2026 – Present**
(Onsite – SSAB Green Steel Megaproject, EUR 4.5B)

- Led the **end-to-end reporting cycle** for one of **Europe's most advanced green steel megaprojects**, ensuring timely, accurate, and high-quality insights for **engineering, planning, cost, and management teams**.
- Consolidated, **validated, and analyzed data** from **15+ cross-discipline** stakeholders, enhancing **visibility of technical progress** and **project performance.**
- Delivered clear and **actionable executive-level reports**, supporting **strategic decision-making** for senior consultants and the Report Manager.
- Engineered **automated 20+ ETL pipelines** in Microsoft **Fabric** (Dataflow Gen2) and integrated workflows using **Power Automate**, improving reporting **efficiency and reliability**.
- Transformed **complex datasets** using **Power BI, Excel, Power Query, and VBA**, improving report **clarity and reducing processing time**.
- Performed **cost and change-order** trend analysis, recommending **corrective actions** that strengthened **project performance** insights.
- Reinforced **reporting governance**, traceability, and document-control standards across the full reporting ecosystem.
- Collaborated with **technical leads** to drive data-driven improvements, contributing to more **consistent and transparent** project reporting.

Project Controls Specialist - Fluor Corporation - Denmark **May 2024 – Jan 2026**
(Onsite -Fujifilm Biotechnologies – Milky Way Life Science, EUR 1.5 billion)

- Facilitated efficient communication of **project progress, risks, and schedule updates** by utilizing advanced **reporting tools and dashboards**, supporting timely management **decision-making**.
- **Administered** and optimized Primavera P6 and reporting systems, improving **schedule visibility by 40%** across project team.
- Collaborated with a team of **20+ Construction Leads/Managers** to orchestrate the implementation of an efficient Project Process, enhancing progress measurement.
- **Enhanced decision-making** by collecting, interpreting, and presenting **quality data** in a clear and timely manner.
- Monitored and evaluated reports from **40 contractors**, identifying discrepancies and ensuring compliance with Fluor systems, which resulted in a **25% reduction in reporting errors.**
- **Partnered with Project Directors** to conceptualize reporting systems, enhancing project phase **visibility by 40%.**
- **Boosted performance 20%** on behalf of clients by recommending process improvements based on insights gained from **in-depth data analytics.**
- Engineered over **20+ Power BI dashboards, SQL, Python** and Excel VBA reports, slashing report generation **time by 50%.**
- Conducted **2-3 weekly training sessions** for project stakeholders, attaining a 95% onboarding satisfaction rate.
- Facilitated **knowledge transfer** sessions for cross-functional project teams, strengthening competency in project controls tools and ensuring quicker adaptation to evolving procedures.

Business Transformation Admin - NLB Services (APAN Energy – Guyana, South America) October 2023 - May 2024

- Enhanced the effectiveness and profitability **of digital construction** by partnering **with C-suite executives** to identify performance gaps and implement digital solutions.
- Formulated over **10 business policies and procedures** encompassing HR policies, accounts and purchasing processes, safety manuals, and operational guidelines.
- Crafted a comprehensive **Request for Proposal (RFP)** for an Enterprise Resource Platform **(ERP/SAP)** and designed the overarching **architecture of a digital ecosystem.**

Technical Manager - IT System – Teknobuilt (Saipem Daewoo Chiyoda JV – Milan, Italy) April 2019 - October 2023

- **Acted** as **product owner** for enterprise systems across **$80B LNG project**, integrating **20+ platforms** into a unified system.
- **Facilitated 20+ design** thinking meetings to help customers define their innovation **roadmap**, and managed **agile** design and development **sprints** to create **MVP solutions**.
- **Efficiently demonstrated** products to **35+ international clients** (Shell, Jacobs, Mc Dermott, EY, KPMG, McKinsey, ARAMCO, etc.).
- **Steered 200+ user training** and onboarding on product in 2 years.
- Brainstormed and created **20+ data analytics visual dashboards** for a top EPC client on an $8B project which helped the client to achieve real-time visibility of the project. Skills utilized: **Power BI, DAX and SQL**.
- **Implemented AWP** project control system, involving **engineering, construction, procurement, quality, close-out and commissioning** modules for **NLNG- Shell $80B USD LNG project**.
- **Integrated data of 20+ systems** into single platform for better visibility.

EDUCATION

Bachelor of Technology in Electrical Engineering

Uttar Pradesh Technical University • India • 2010

SKILLS

- **Data Analysis**
  SQL | Python | Power BI | ETL| Advance Excel - VBA | DAX | Power Query | Power Automate
- **Tools**
  Azure | Fabric | SSMS | MySQL | Jupyter Notebook | Primavera | Power BI |Hexagon Smartplant | Navisworks | Postman | Jira |SAP | ERP| Acconex
- **Project / Workflow**
  Forecasting and Predictive Analysis | Data Modeling | Dashboard Development | Reporting and KPI Tracking | Agile and Lean Methodologies| AWP - Advance Work Package | Workface Planning |Work Package Owner (WPO)
- **Soft Skill**
  Analytical Thinking | Problem-Solving | Attention to Detail | Business Acumen | Stakeholder Management
- **Industry Exposure**
  CAPEX & OPEX | Pharma & Life Science | Oil & Gas | Green Energy | Green Steel | IT- Digital Transformation
